

## Preface

I have often been ask for a list of country codes used in the amprnet network and have reproduced the list by Brian Kantor available on the Internet.  
Paul G4APL

**AMPRNet IP address coordinators as of 20 May 2002**

Corrections and updates to brian@ucsd.edu.

Note: the people listed here have volunteered to issue IP addresses for their areas. They are not paid to do this service; please understand that they are perfectly at ease to deal with coordination responses at a lower priority than the things that matter more, such as job and family. Please be patient when requesting an address.

Note subnet widths.
